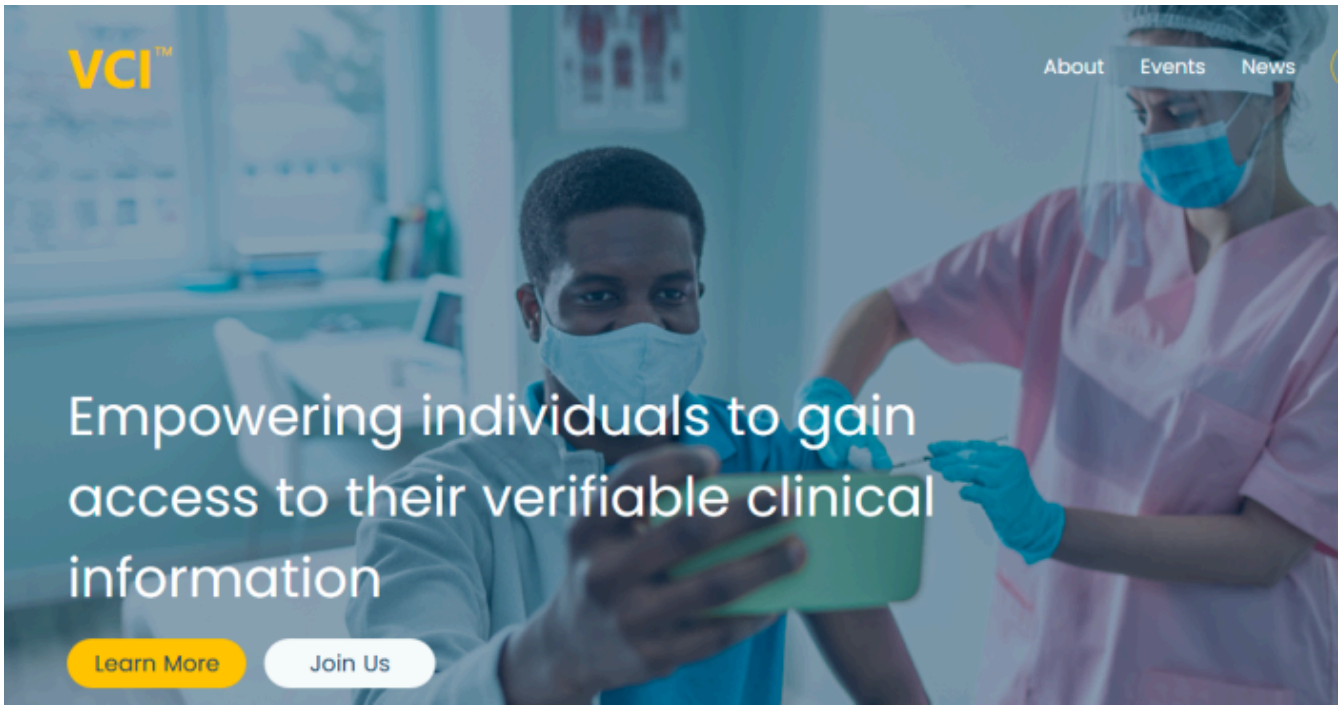
Vaccine Credential Initiative: Passports; Digital Health Passes; Ontario; Ford



Don’t worry, global vaccine passports are just a crazy conspiracy theory. That’s what they tell us. In reality, hundreds of organizations are partnering to get digital health passes and vaccine records going.

Microsoft is a familiar name.
Why is that?

The presence of Microsoft as a partner in VCI should surprise no one. After all, this organization helped started up ID2020 in 2016, along with GAVI and the Rockefeller Foundation.

The Commons Project (TCP) is also listed as promoting Vaccine Credential Initiative. TCP is also prominently featured by the World Economic Forum, and gets funding from Rockefeller.

From VCI's YouTube channel, they describe themselves and their work in the following way:

> Description
> VCI is working to ***enable individuals vaccinated for COVID-19 to access their vaccination records*** in a secure, verifiable and privacy-preserving way. The Coalition is ***developing a standard model for organizations administering COVID-19 vaccines to***

> ***make credentials available in an accessible, interoperable, digital format***. empower consumers to conveniently access, store, and share digital COVID-19 vaccination records.

The webinars are publicly available, and the next one is scheduled for June 16. Should be quite enlightening.

Vaccine Credential Initiative - VCI - March Meeting

Vaccine Credential Initiative - VCI - April Meeting

April speakers include: Gainwell, Common Trust Network, World Economic Forum, Mayo Clinic. Smart Health Pass details being shared.

Louisiana has apparently already had “digital driver’s licenses” for a few years now. Also, instead of using the term “vaccine passport”, we should call them “vaccine verification” in order to make it less obvious. Smart health cards are coming. Only “approved” issuers list will be coming.

> The VCI™ Charter
> VCI™ is a voluntary ***coalition of public and private organizations committed to empowering individuals with access to verifiable clinical information***, including a trustworthy and ***verifiable copy of their vaccination records*** in digital or paper form using open, interoperable standards.
> .
> The scope of VCI™ is to harmonize the standards and support development of implementation guides needed to issue, share, and validate vaccination records bound to an individual identity.
> .
> Individuals can then use those verifiable credentials ***for medical purposes and to demonstrate their vaccination status to safely return to work, school and travel.***
> .

> A ***SMART Health Card stores healthcare information and other vital medical data***.
> SMART Health Cards provide a platform to:
> -Improve privacy and security of patient information
> -Make medical records portable
> -Reduce healthcare fraud

The Province of Ontario, specifically the Ministry of Health, is also listed as a partner. Strange, there wasn't any public announcement of this. This may have something to do with the recent announcement that Ontario would be launching a digital ID. (Archive)

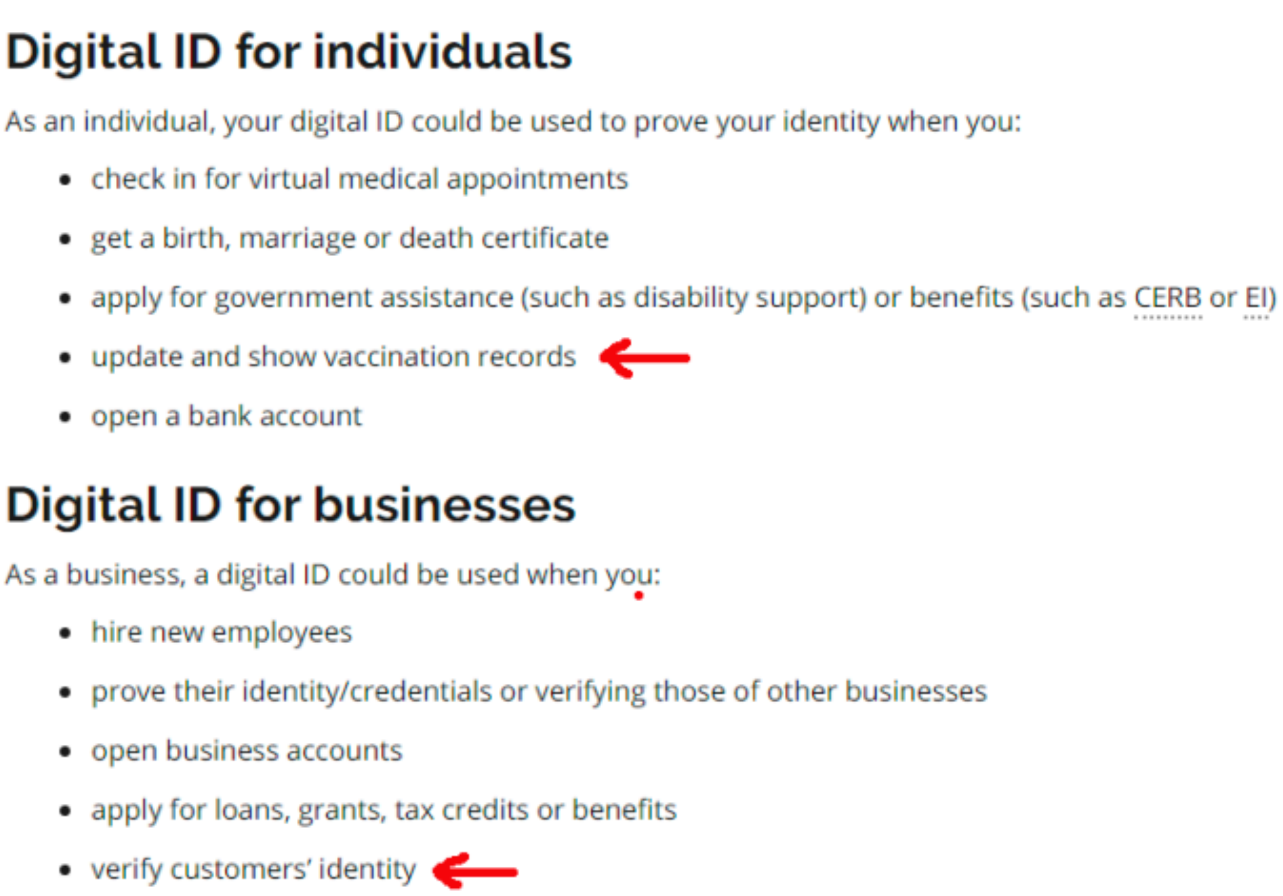
Ontario's digital ID plan
In late 2021 we will begin introducing digital ID (digital identity) – a new, electronic government-issued ID that lets people and businesses prove who they are online.
Learn more about digital ID, our public consultations and what's next.
Our public consultations for digital ID are now closed.
Digital ID gives you more online options to access government services from anywhere.
Digital ID for individuals



Digital ID for individuals

As an individual, your digital ID could be used to prove your identity when you:

- check in for virtual medical appointments
- get a birth, marriage or death certificate
- apply for government assistance (such as disability support) or benefits (such as CERB or EI)
- update and show vaccination records
- open a bank account

Digital ID for businesses

As a business, a digital ID could be used when you:

- hire new employees
- prove their identity/credentials or verifying those of other businesses
- open business accounts
- apply for loans, grants, tax credits or benefits
- verify customers' identity

Something to note here: the webpage explicitly states that vaccination records are an application for this digital ID. On the "businesses" portion, it states that this can be used to verify customer identity.

So combine the 2 ideas: customers can verify their vaccination status digitally, and businesses can use these IDs to verify who their customers are. This isn't a stretch to see that this invites so-called vaccine passports as a condition to enter certain places, or work at some of them.

Wouldn't it have been nice if this partnership had been publicly disclosed? There doesn't seem to be any media or government announcement of it.

Although not listed, Walmart is also apparently a supporter of this project. Coincidently, Walmart heavily lobbied Ford into letting the company remain open, while small businesses were forced to close.

Ford and the Ontario parties are also too close to pharma lobbyists, as shown here, here, here, here, and here. Not that the Federal Conservatives, or others are any better.

Ford defers endlessly to the Ontario Science Table, abdicating his responsibility to govern. Quite the rabbit hole. However, the OST is riddled with conflicts of interest, both ideologically, and financially. It's possible he's completely unaware of all of this. But it seems more likely that he doesn't care.

"For The People" was just an empty slogan.

The Commons Project
The Commons Project is a non-profit public trust, established with support from the Rockefeller Foundation, to build digital services for the common good. Its CommonHealth Android platform lets people collect and manage their personal health data and share it with the health services, organizations and apps they trust.
Visit the The Commons Project website
Headquarters
USA

The Commons Project is featured prominently on the World Economic Forum's site. Both TCP and WEF receive substantial funding from the Rockefeller Foundation. In October 2020, Paul Meyer, the CEO, wrote an article about how to restore trust in air travel.

As an aside, ETFO is also tied to World Economic Forum. Both teacher and health care worker pensions are tied to advancing the GREAT RESET. They own the right stocks.

TCP and WEF also are partnered to run the Common Trust Network to push for vaccine certificates everywhere. Of course, instead of being preplanned and calculated, they spin it as "empowering individuals". Mastercard also supports this, and is a partner at ID2020. IBM, Oracle and Salesforce are involved (and also part of VCI). These are just a few of the connections.

Don't you get it? When they say "we're all this together", they really mean they have all been colluding.

It’s all quite terrifying. “We are all in this together,” we the slavemasters and you the slaves, if our injections haven’t killed you.
